[Law firm representing victims of toxic exposures](#)**Re: toxic encephalopathy - chemical injury to brain**Posted by diane Marbot, dmarbot@suffolk.lib.ny.us, on 9/28/98

My son Jason is 10 years old he is allergic to foods and dust, mold, ect... I have been having a problem with him going outside for the last 4 months. When he goes outside usually on damp humid days. He only returns in saying he is hot & wobboly & he feels like his throat is closing & he cant breathe. If I bring him in his room which is purified & air conditioned in about 15 minutes he is OK. I could use any help I can get. I dont know what to do. The doctors think I am crazy. Any info anyone can give me would be greatly appreciated.

Thanks Diane Marbot
